## State-of-the-Art Communications

Imagine your exclusive luxury resort community with one of the world's most sophisticated and advanced communications systems. A system where high-speed broadband, with enhanced bandwidth, provides:

- Crystal clear, reliable local and long distance calling services
- Hundreds of digital cable television channels, including DVR and HDTV
- Internet connectivity, as well as video and data downloads, at the fastest speeds available

It's the ultimate triple-play Fiber-to-the-Home (FTTH) package of Voice, Video and Internet, backed by fiber optic technology that makes every home future-ready for today's ever-changing high-tech environment.

**It's all available today.**

Internet

## **A Single Source... A Complete Turnkey Solution**

Now imagine one organization that assembles the leading vendors in the communications industry to deliver your turnkey triple-play FTTH solution. Integrating the latest proven technology, this world-class team provides products and services for each step of the process, including:

- Custom Designing Your System
- Burying Conduit
- Pulling the Cable
- Building the Headend
- Setting Up a Satellite Downlink
- Arranging for Internet Connections and Phone Services
- Providing Video Content

And, once all of the components have been thoroughly tested, that single-source organization will launch your system, train and develop your support staff and provide long-term maintenance and operational support

**That organization is  
Tri-Fi Solutions.**
